PlateRite 8600MII-S/E

Thermal Plate Recorder

SCREEN

| Product name | PlateRite 8600MII-S | PlateRite 8600MII-E | | |
|------------------------|---|--|--|--|
| Model name | PT-R8600MII-S | PT-R8600MII-E | | |
| Recording system | External drum | | | |
| Light source | 64-channel laser diodes | 32-channel laser diodes | | |
| Plate size | Maximum 1,060 x 830 mm (41.7" x 32.6"); Minimum 450 x 370 mm (17.8" x 14.6") | | | |
| Exposure size | Maximum 1,060 x 806 mm (41.7" x 31.7") | | | |
| | [Maximum 1,060 x 806 mm (41.7" x 31.7") at 900 rpm; Maximum 1,060 x 810 mm (41.7" x 31.8") at 600 rpm] | | | |
| Plate | Thermal aluminum plate | | | |
| Plate thickness | 0.15 to 0.3 mm (6 to 11.8 mil) | | | |
| Resolutions | 1,200/2,400/2,540 dpi *1 | | | |
| Repeatability | ± 5 µm *2 | | | |
| Productivity | 20 plates/hr (1,030 x 800 mm/40.5" x 31.4" plates) at 2,400 dpi *3 *4 | 13 plates/hr (1,030 x 800 mm/40.5" x 31.4" plates) at 2,400 dpi *3 * | | |
| Interface | F-PIF | | | |
| Plate transport | Semiautomatic loading | | | |
| Dimensions (W x D x H) | Main Unit: 2,500 x 1,120 x 1,320 mm (98.5 x 44.1" x 52") | | | |
| Weight | Main Unit: 880 kg (1,930 lb) | | | |
| Power requirements | Main unit: Single phase 200 V to 240 V, 30 A, 4.0 kW | | | |
| Environment | Recommended: 21 to 25°C (69.8 to 77°F); Required: 18 to 26°C (64.4 to 78.8°F); Relative humidity: 40 to 70% (no condensation) | | | |
| Applicable standard | Conform to IEC 60204-1 | | | |

*1. 1,200 dpi uses 2,400 dpi double dots.

*2. Over four consecutive exposures on one plate at 23°C (73.4°F) and 60% relative humidity.

*3. Productivity may vary depending upon media sensitivity. *4. Productivity is calculated so it includes 10 seconds for loading and unloading per plate.

No.205-149E Printed in Japan 01-13 040FSI(R0-0)

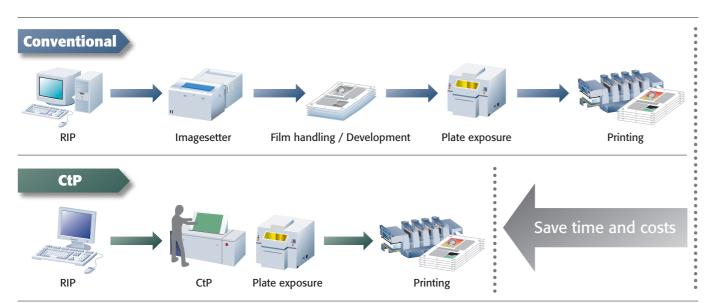

The PlateRite 8600MII is a high-quality, entry-level CtP recorder that will provide the foundation for a fully digital platemaking workflow.

| SCREEN | 9.992 2.233 | 0 0 | / | |
|--------|----------------|-----|---|-----|
| | | - | • | 100 |
| | | | | |
| | | | | |

Faster turnaround *plus* improved quality and lower costs

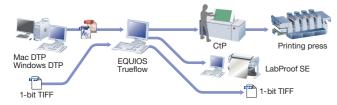

CtP benefits

- 1. Improved registration and press productivity
- 2. Reduced turnaround times from the shortened production process
- 3. Cost reduction through the elimination of film processing
- 4. Sharper, more accurate dots
- 5. More consistent quality and reduced labor costs

Full-digital workflow

EQUIOS (Workflow system)

An EQUIOS workflow system helps to achieve maximum productivity. Linking with EQUIOS enables non-stop automation while minimizing errors and production losses. Output to a CtP recorder is also easier than ever before.

Based on international standards

The PlateRite 8600MII conforms to all relevant international standards. It is produced at an ISO-certified factory and its design meets specified safety standards. It is also assembled using primary electrical parts that meet all UL, CSA and CCC requirements.

The PlateRite 8600MII conforms to the following standards.

- IEC60204-1 Mechanical safety
- •IEC60825-1 Safety of a laser product
- •UL/CSA/CCC marking
- •ISO9001 (2005/12)
- •ISO14001 (2007/11)

Furthermore, CtP eliminates paste-up errors and foreign-matter contamination,

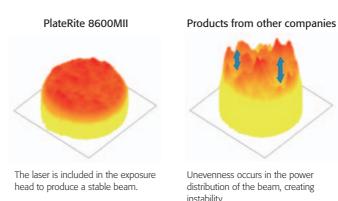

The PlateRite 8600MII is another high-quality thermal CtP recorder built with the renowned technology and expertise that have made Dainippon Screen the world's number one CtP manufacturer. Screen's unique thermal external drum technology is combined with its highprecision optics to enable fast and high-quality plate output. As there is no need for complex processing and intermediate steps, such as outputting layout data to film or exposing plates using film, the plate production process with CtP is much simpler than traditional platemaking. contributing to increased efficiency in both the platemaking and printing process. Last but not least, thermal CtP output produces sharper halftone dots than traditional platemaking methods, and therefore dramatically improves printing quality.

Screen's technologies

Optical system technology

Stable exposure beam

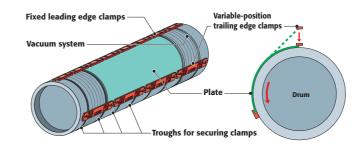

With the PlateRite 8600MII, the exposure head and its built-in laser move as a single unit. This prevents any profile fluctuation caused by changes in the shape of the optical fiber and produces a stable beam.

Drum technology

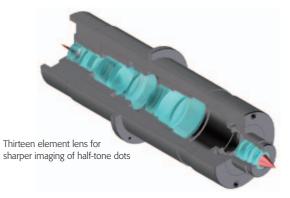

Reliable plate securing system

The PlateRite 8600MII recorder features an automated clamping and vacuum system. This system can consistently and firmly secure a wide range of plate sizes, even during fast-rotation/high-speed exposure. A plate is fixed to the drum by a unique slot equipped with a clamp and a vacuum attachment system.

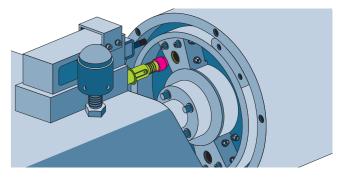

Fine imaging lens

The PlateRite 8600MII capitalizes on Screen's advanced optical technology. It features high refractive index glass and an impressive 13 element lens design for sharper imaging of half-tone dots. Proprietary technology also compensates for shifts in the focal position caused by environmental temperature variations.

Auto-balance system

The PlateRite 8600MII features Screen's unique and precise autobalance system. It ensures the counter weights automatically adjust with every change of plate size, maintaining smooth and silent drum rotation. This system is easy to set up via the display menu without any technical intervention.
